

Introduction to Blackboard for Students

This Introduction to Blackboard is **optional**, not mandatory. It introduces students to the most commonly used functions in Blackboard and allows them to see and practice submitting the assignment tools (tests, drop boxes, and discussion forums) most commonly used by instructors.

If you would like to enroll in this Introduction, do the following on the Blackboard Landing Page (first page you see after logging into Blackboard):

1. Scroll to "Organization Catalog."
2. Click "Enroll into Introduction to Blackboard for Students."
3. Click the arrow at the end of 827_INTROTOBBSTU_ORGANIZATION_
4. Click "Enroll" and then "Submit."

The Introduction to Blackboard for Students link will appear under "Organization List." Remember that this is completely optional. Enrolling and completing this short Introduction has no impact on your standing at CTC or on your grades in any course.
